

# Foot Bath Mat

## Stop Contamination at the Door!

Foot Bath Mats benefit people in the food industry by effectively cleaning & sanitising footwear before entering or when passing from one area to another within the plant. They are not permanently built-in, and can therefore be positioned at any location to suit your present requirements. The 50mm (2") depth of this Foot Bath Mat guarantees that the sanitising solution contacts the soles, sides & welt area of boots, penetrating even into deep treads. As the user wipes their feet, hundreds of flexible rubber fingers on the base of the Foot Bath Mat scrub soles clean. This finger design lets contaminants settle undisturbed, while the boot contacts clean solution only. The 810 x 980mm (32" x 39") size covers most doorways and is long enough for workers to step in it with both feet without breaking their stride ensuring that personnel cannot bypass the footbath. For wider entry ways, multiple Foot Bath Mats can be placed side by side to cover the whole entrance.

- ✓ Raised walls to hold sanitising solution or any liquid for hygienic cleaning
- ✓ Yellow edges for high visibility
- ✓ Cross grip rear design anchors the mat to floor
- ✓ Simply tip to empty - no pumps or drains required
- ✓ Rubber bristles on base reduce slipping hazard
- ✓ Solid walls won't sag or allow solution to run out
